Who are we?

Greening Group was established in 2011, with the aim of bringing both public and private companies closer to the **promotion of renewable energies** through the design and construction of **industrial self-consumption facilities**, solar water pumping and development of energy efficiency projects.

Our structure

Today, **Greening Group** is made up of a total of **seven companies**, each one of them specialized in a service area that allows us to be vertically integrated throughout the value chain.

Customer Service

Internacional presence

At **Greening Group** we are working to build a more sustainable world.

We are present in six countries on three continents: **Europe, America and Africa**. We have our own offices in **Granada, Madrid, Barcelona, Rome, Milan, Mexico City, Monterrey and Rabat**.

We have recently entered two new markets: **Düsseldorf and Miami**.

6 countries on 3 continents

Energy Group Renewable-focused

International leader in offering energy solutions based on **sustainability and efficiency**.

We manage more than **2,000 100% green and sustainable** energy supply points.

We have developed **255 MW of energy in industrial self-consumption** facilities.

We are committed to the future with more than **55,000 tonnes of CO2** avoided in the atmosphere.

We generate our own sustainable energy with more than **5 GWp of projects** under development.

We have achieved savings of **€50 million for our customers**.

We are driven by the drive and talent of our **more than 400 professionals**.

Milestones and goals

Business Lines

Vertically integrated, through power generation.

1. Energy solutions

- Solar Self-consumption
- Energy Efficiency
- Storage

2. Generation

- Network Sales Parks
- Industrial and SME PPA Contracts

3. EPC

- EPC services for own and third party projects

4. Energy marketing

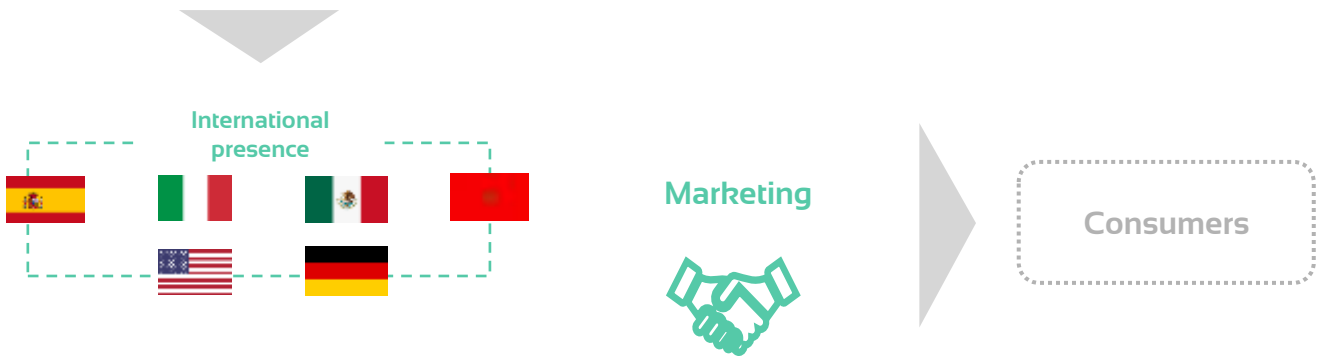

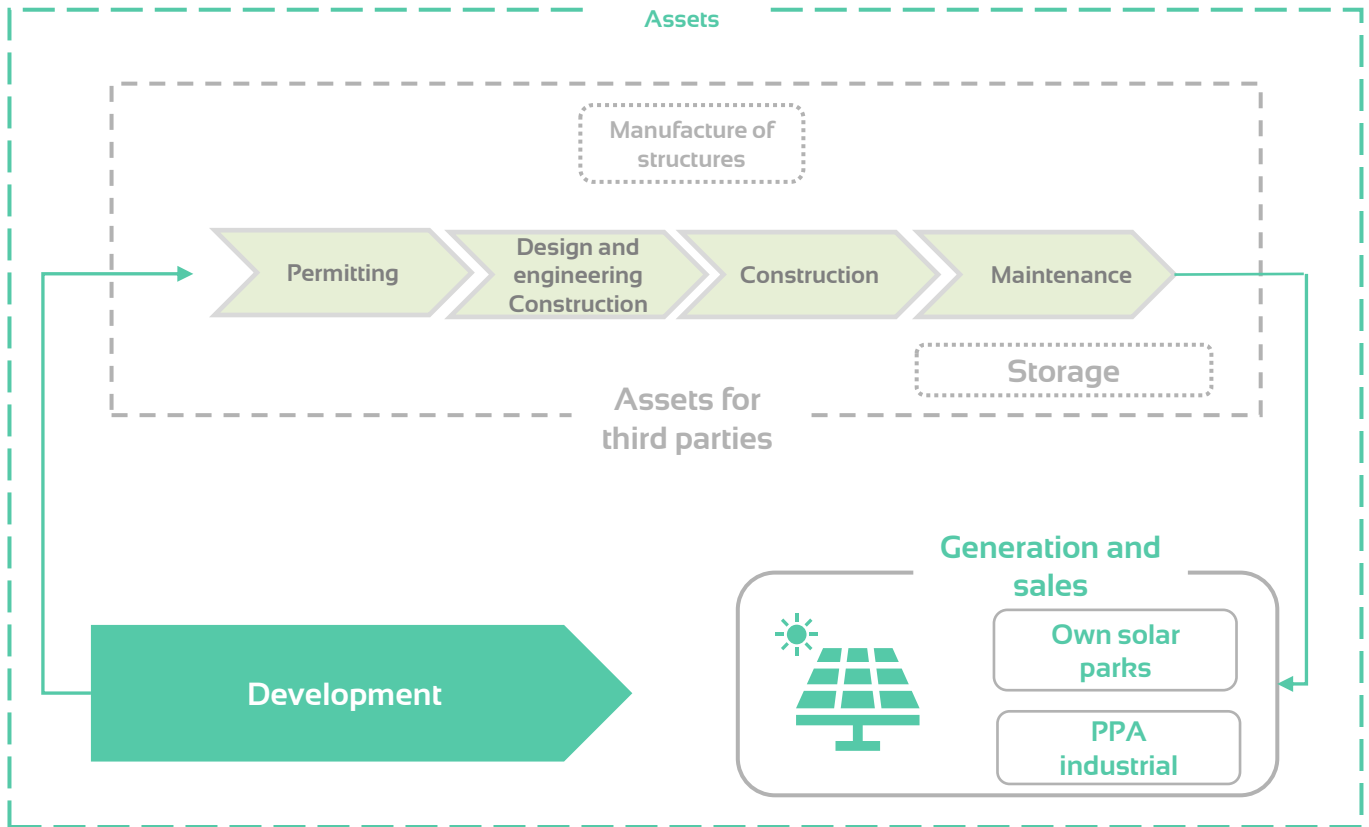

- Selling renewable energy
- Energy Communities

5. Product

- Manufacture of Photovoltaic structures
- Control panels and systems
- Electronic recycling

Chain Integrated value

Comprehensive service through its different business lines ranging from the development, engineering, construction and maintenance of photovoltaic projects to the generation and marketing of energy.

Sustainable Development Goals

The world needs to change. Having a more **sustainable planet** is a team effort.

At **Greening Group** we work to build a more sustainable world. Our **installations and projects are a key element** in the evolution of renewable energies and conservation of the planet. Thanks to the installations we develop, we are able to contribute annually to the **fight against climate change** with the following objectives

100% renewable production

Use of renewable energies.

Carbon neutrality by 2030

Reversing, climate change

Increasing electric mobility services

Implementation of climate change adaptation plans.

Companies producing their own energy

Creating sustainable communities.

Scholarship programme

Development opportunities through education.

A target for each year: 0 accidents

Improved security management and performance.

1000 Wastewater Treatment Plants

Increase the number of customers with sewage treatment plants.

30% of female employees by 2025

Gender equality is recognised as a basis.
